

Patient Online: Records Access

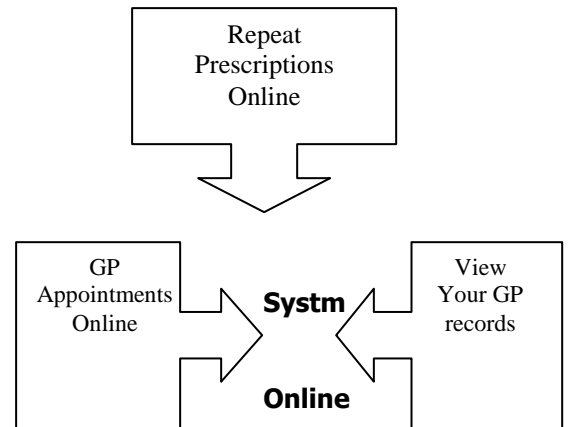

Patient information leaflet 'It's your choice'

If you wish to, you can use the internet to book Appointments with a GP, request repeat prescriptions for any medications you take regularly and now look at a summary of part of your medical record online. You can also still use the telephone or call in to the surgery for any of these services as well. It is your choice.

The plan is to eventually release your full medical record online and this will help you to manage your medical conditions. It also means that you can even access it from anywhere in the world should you require medical treatment on holiday. If you decide not to join or wish to withdraw, this is your choice and practice staff will continue to treat you in the same way as before. In general this decision will not affect the quality of your care.

When you apply at Reception, you will be given login details, and a password. This will ensure that only you are able to access your record – unless you choose to share your details with a family member or carer.

The practice has the right to remove online access to services for anyone that does not use them responsibly.

It will be your responsibility to keep your login details and password safe and secure. If you know or suspect that your record has been accessed by someone that you have not agreed should see it, then you should change Your password immediately.

If you cannot do this for some reason, we recommend that you contact the practice so that they can remove online access until you are able to reset your password.

If you print out any information from your Record, it is also your responsibility to keep this secure. If you are at all worried about keeping printed copies safe, we recommend that you do not make copies at all.

Before you apply for online access to your record, there are some other things to consider.

Although the chances of any of these things happening are very small, you will be asked to confirm that you have read and understood the following before you are given login details.

Things to consider

Forgotten history
There may be something you have forgotten about in your record that you might find upsetting.
Abnormal results or bad news
If your GP has given you access to test results or letters, you may see something that you find upsetting to you. This may occur before you have spoken to your doctor or while the surgery is closed and you cannot contact them.
Choosing to share your information with someone
It is up to you whether or not you share your information with others – perhaps family members or carers. It is your choice, but also your responsibility to keep the information safe and secure.
Coercion
If you think you may be pressured into revealing details from your patient record to someone else against your will, it is best that you do not register for access at this time.
Misunderstood information
Your medical record is designed to be used by clinical professionals to ensure that you receive the best possible care. Some of the information within your medical record may be highly technical, written by specialists and not easily understood. If you require further clarification, please contact the surgery for a clearer explanation.
Information about someone else
If you spot something in the record that is not about you or notice any other errors, please log out of the system immediately and contact the practice as soon as possible.

More information

For more information about keeping your healthcare records safe and secure, you will find a helpful leaflet produced by the NHS in conjunction with the British Computer Society:

Keeping your online health and social care records safe and secure
